What is the Customer Generator Size? (KVA)	
Project Comments (e.g. will the solar system be connected to the Grid?)	

ELECTRICAL LOADS

[illegible]

Total Energy Kwh (Day + Night) =						Total KWh Day		Total KWh Night

Note: The estimated Backup time is subject to the natural deterioration of the Consumable Components (Batteries).

*If the table above isn't big enough to contain all appliances, this page can be duplicated again and filled after the signatures.

** This refers to the number of hours the Energy system is to run on battery power alone.

- Is the customer aware you are installing an energy solution and not rectifying existing electrical faults in the vicinity? Yes ☐ No ☐
- Is the site ready for installation; Permission to mount on the roof obtained, building not under renovation, etc? Yes ☐ No ☐
- Will the Energy system be installed with remote monitoring capability? Yes ☐ No ☐
- Before the installation commences, confirm the roof will be assessed for solar panel mounting to ensure no issues? Yes ☐ No ☐
